

A comprehensive range of high performance fire doors & door sets are available in both FSC® (FSCC011471) certified and Non-FSC® certified by request, throughout our full range.

**Caledonian  
Plywood Company**

Caledonian Plywood Company Ltd  
Fire Door Manufacturing Division

## About Caledonian Plywood

*Caledonian Plywood is one of the country's largest and most successful importers of plywood. If we were to measure that success in industry awards, we would be without equal, four UK Plywood Trader of the Year awards in five years speak for themselves.*

The company's roots go back to the 1970s, when our current senior partner Douglas Kilpatrick joined his father's newly formed plywood importing business. Founding Caledonian Plywood in 1990, Douglas and the other Partners Stuart Mckelvie and Derrick Bartlett set about growing the business substantially - while retaining the strong customer ethos that earned us our reputation as one of the best in the industry.

Expanding south in 1999, the company enjoyed an exceptional period of growth, creating a wider customer base through the Tilbury sales office. As well as sourcing the right product at the right price for our customers, we play a pivotal role in the UK industry we are members of UK Timber Trade Federation, Scottish Timber Trade Association, UK Timber Research & Development Association (TRADA). We are ISO9001:2008 certified, have the Q Mark for fire door manufacturing and hold FSC<sup>®</sup> and PEFC<sup>™</sup> Certification. Caledonian Plywood Company was also one of the first importers to sign up to the TTF Responsible Purchasing Policy.

## Major Plywood Supplier

Caledonian Plywood Company source various plywood panels including hardwood plywood and softwood plywood, as well as a large range of other sheet materials from all over the world, including FSC certified products.

During 2005 Caledonian Plywood Company absorbed the highly successful Caledonian Plywood South Limited into the Partnership, creating a united marketing entity throughout the UK. The word 'partnership' is very important to Caledonian Plywood Company as we work very closely with our key suppliers, logistic partners and Port to offer the very best product and service at each price point.

Further investment in key personnel and machinery have made further advancements in 2006,7,8 and 2009 and set's the platform for continued success for the future. Please contact any member of the team and we'll be more than happy to fill you in with any further information you may require.

Our widely acclaimed CP Fire Doors are built to a superior standard and offer safety and stability in extreme conditions - having been rigorously tested at each stage of their development. We also offer a range of Secure and Light Solid Core Doors . The light range offers a lightweight alternative, but with all the benefits of a fire door. The Secure doors range is ideal for local authorities replacement doors or where weight is not critical, but security is.

*Our Veneer range combines all the features of our Secure range, with a variety of attractive finishes.*

## Shipping & Distribution

We source plywood and related sheet materials from all over the world. Our knowledge of both the global markets and their unique products ensure that we can track down, secure and ship the best and most comprehensive ranges for our customers.

We can organise shipments by containers and have close working relationships with our logistics partners in the UK, our long-standing partnership with Forth Ports plc gives us key distribution points at Tilbury and Grangemouth. This partnership has also allowed us to take our award-winning business into new European markets and we now have a sales office and plywood warehouse in Valencia, Spain.

*Our own fleet of Euro Class 5 curtain-sided trucks take our plywood products to customers throughout the UK from our warehouse and manufacturing head office in Uddingston, Central Scotland and from Tilbury.*

# Plywood Panel Products

*We're confident that we can supply the products you need, in the quantities you need, whenever you need them.*

We offer a comprehensive range of plywood panels, sourcing from key markets across the globe, we supply directly to our customers in the UK and Europe.

We carry imported plywood from Malaysia, including CPD compliant CE2+ structural, MTCS and FSC certified. We also import plywood from the emerging Chinese market where we utilise local species in compliance with NGO guidelines. Our South American plywood includes CPD compliant CE2+ structural.

Our product mix also covers film-faced plywood, blockboard, MDF, chipboard flooring, CP fire doors, hardboard and veneered MDF and plywood.

*The Plywood Trader of the year award shown opposite is just one of the recent awards that Caledonian Plywood have been handed by the industry.*

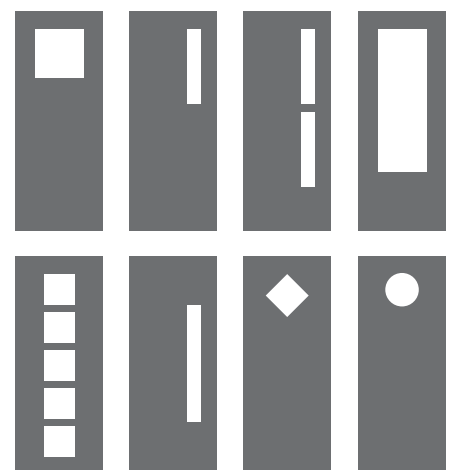

## Bespoke Caledonian Plywood Doors

*All bespoke manufactured doors and doorsets can be offered (if within fire certification regulations) with the real wood veneer of your choice, plus we can aperture, glaze, add acoustic seals, or prefinish, just let us know your specification and we will do the rest!*

Our Fire Doors have been tested by TRADA and Chiltern Fire in a plain blank form and finished lipped fire doors/sets, with apertures. CP Fire Doors are covered by numerous fire tests and global assessments, giving peace of mind.

The range is complemented by a complete bespoke manufacturing service including lipping, aperturing, dimensioning, veneering in any real wood veneer of your choice and to complete the job we also offer a prefinishing option.

## Client Experience & Recent Projects

As an independent plywood and sheet material supplier as well as a bespoke Door and Doorset manufacturer, our branches obtain a number of projects in relation to our supply ability.

We are currently undertaking projects in a variety of locations on behalf of our customers including Hospitals, Schools, Shops and Hotels. In addition, we have received a high demand from merchants who have placed a large number of orders for doors with us.

Listed below are some examples of the locations where we have been supplying recently:

- The James Beckett Hospital
- Leeds General Infirmary
- RAH Maternity Hospital
- Gartnavel Hospital (Glasgow)
- Bridgeton Health Centre
- Sefton Sixths Form College (Liverpool)
- Sir William Stanier School (Crewe)
- Bradford Primary School, Bradford
- Lloyd's Pharmacy, Paisley
- Edinburgh Airport
- Aldi Stores
- Goldsmith Leisure
- The George Washington Hotel, Newcastle
- Euro Tower Hotel (London)
- Dunblane Hydro
- Standard Chartered Bank
- Scottish Heritage (Grade 2 listed building) Dundee
- Lingfield Racecourse

# Q Mark Certification - Dont- take the risk

**Q: As a specifier, purchaser or contractor, you are likely to be procuring a wide range of products and services. In the case of a complex product, where performance is critical, how can you be certain that the product you choose will perform and that you have done everything you can to mitigate against the risk of failure?**

**A: By specifying that the product has independent third party certification.**

## **What is independent third party certification?**

Independent third party certification is the highest form of endorsement a product can achieve and is being increasingly specified by architects, contractors, local authorities, facilities managers and procurement managers. In addition, its contribution and its importance have been widely accepted for some time by a number of recognised bodies.

To attain third party certification, a manufacturer and their product will have to undergo a rigorous audit and testing process, ensuring that they have in place documented product specifications, installation instructions, and a factory production control system, all of which integrate with an approved Quality Management Scheme such as ISO 9001.

## **The benefits of specifying independent third party certification.**

Here's why you should specify independent third party certification:

- Consistency of product quality at all times
- Independent verification of product quality
- Ensures the product is fit for its intended purpose
- Ensures the product is safe to use
- Mitigates against the risk of product failure
- A commercially sound investment

# Q Mark Certification - Dont- take the risk

## BM TRADA Q-MARK

BM TRADA Q-Mark is the brand name applied to the scheme operated by BM TRADA Certification, one of the UK's foremost certification bodies with over 35 years experience and accredited by UKAS since 1991.

BM TRADA Q-Mark is a quality mark for a product, identifying it as having been assessed against specified performance levels through independent accredited tests. It also shows that every product manufactured will offer the same level of performance through integration with an approved Quality Management Scheme. Continuous performance and production are also checked through regular audit testing and inspections.

### Why specify BM TRADA Q-Mark certification?

- One of the UK's leading providers of independent third party certification
- A recognised and widely accepted quality standard
- Independently accredited by United Kingdom Accreditation Service (UKAS)
- Experts in the field of doors, windows, glass and fire resistant products
- Rigorous eligibility and on-going membership criteria
- Audits conducted by full-time customer specific auditors with a manufacturing background
- Consistency in auditing procedures across multiple manufacturing sites
- Regular factory audits conducted to ensure consistency in product manufacture
- Regular sample testing to ensure consistency in product quality
- Continuous review process to ensure scheme operates to highest standards

To be confident that the product you specify will perform as expected, make sure you include the following clause in your specification: All (product type) must be fully manufactured and installed under the appropriate BM TRADA Q-Mark scheme.

## Caledonian Plywood Fire Door Cores

### CP Light:

The light range offers all the benefits that you'd expect from a QMark fire door, but in a lightweight package.

### CP Secure:

Offering all the features and benefits that you'd expect from a QMark fire door, our Secure range provides peace of mind in any circumstance.

# The Caledonian Range

The manufacturing division of Caledonian Plywood Company manufacture a range of high performance fire rated doors and doorsets in a range of weights and finishes.

CP Fire doors are built to a superior standard with several key selling points.

*We have named our range of high performance fire doors after the beautiful Scottish islands that are part of Scotland's natural heritage.*

## Colonsay

The Colonsay range of doors can be manufactured in FD30 Or FD60 format with a flush Plywood, MDF or Chipboard face and overlaid with any real wood veneer of your choice, the Colonsay range is manufactured with the wood veneer grain running vertically with the length of the door.

These doors can be manufactured giving an exposed hardwood lipping all round or if you prefer the lipping can be concealed behind the face veneer.

*All bespoke manufactured doors and doorsets can be offered (if within fire certification regulations) with any real wood veneer of your choice, aperture, glazing, acoustic seals, prefinished etc, Just let us know your specification and we will do the rest!*

## Arran

The Arran range of doors can be manufactured in FD30 Or FD60 format with a flush Plywood, MDF or Chipboard face and overlaid with any real wood veneer of your choice, the Arran range is manufactured with the wood veneer grain running horizontally across the width of the door face.

These doors can be manufactured giving an exposed or hardwood lipping all round or if you prefer the lipping can be concealed behind the veneer.

*All bespoke manufactured doors and doorsets can be offered (if within fire certification regulations) with any real wood veneer of your choice, aperture, glazing, acoustic seals, prefinished etc, Just let us know your specification and we will do the rest!*

## Lewis

The Lewis range of doors can be manufactured in FD30 or FD60 format with a flush Plywood, MDF or Chipboard face and overlaid with any real wood veneer of your choice, the Lewis range is manufactured with the main veneer running horizontally with the width of the door and has the added addition of a vertical side rail (Approx 120mm wide) with the veneer running vertically on one edge giving the effect of a solid timber engineered door.

These doors are manufactured with a concealed hardwood edge only.

*All bespoke manufactured doors and doorsets can be offered (if within fire certification regulations) with any real wood veneer of your choice, aperture, glazing, acoustic seals, prefinished etc, Just let us know your specification and we will do the rest!*

## Eriskay

The Eriskay range of doors can be manufactured in FD30 or FD60 format with a flush Plywood, MDF or Chipboard face and overlaid with any real wood veneer of your choice, the Eriskay range is manufactured with the main veneer running horizontally with the width of the door and has the added addition of two vertical side rails (Approx 120mm wide) with the veneer running vertically on both edges giving the effect of a solid timber engineered door.

These doors are manufactured with a concealed hardwood edge only.

*All bespoke manufactured doors and doorsets can be offered (if within fire certification regulations) with any real wood veneer of your choice, aperture, glazing, acoustic seals, prefinished etc, Just let us know your specification and we will do the rest!*

## Devaar

The Devaar range of doors can be manufactured in FD30 or FD60 format with a flush Plywood, MDF or Chipboard face and overlaid with any real wood veneer of your choice, the Devaar range is manufactured with a central veneer panel running horizontally with the width of the door and has the added addition of two side rails (vertical veneer) and a top and bottom veneered rails running horizontal, it is then finished with a contrasting inlay around the central veneer to give the effect of a solid timber engineered door.

These doors are manufactured with concealed hardwood edge only.

*All bespoke manufactured doors and doorsets can be offered (if within fire certification regulations) with any real wood veneer of your choice, aperture, glazing, acoustic seals, prefinished etc, Just let us know your specification and we will do the rest!*

## Orkney

The Orkney range of doors can be manufactured in FD30 or FD60 format with a flush Plywood, MDF or Chipboard face and overlaid with any real wood veneer of your choice, the Orkney range is manufactured by firstly inlaying solid timber (as per veneer choice) into the door face, we then overlay with horizontal centre piece real wood veneer with two vertical side rails we then router a v-groove in the door corresponding with the solid timber inlays to give the effect of a solid timber engineered door.

These doors are manufactured with concealed hardwood edge only.

*All bespoke manufactured doors and doorsets can be offered (if within fire certification regulations) with any real wood veneer of your choice, aperture, glazing, acoustic seals, prefinished etc, Just let us know your specification and we will do the rest!*

## Noss

The Noss range of doors can be manufactured in FD30 or FD60 format with flush Plywood, MDF or Chipboard face and overlaid with any real wood veneer of your choice, the Noss range is manufactured by firstly inlaying solid timber (as per veneer choice) into the door face, we then overlay with a jointed veneer lay-on to give the effect of the door having vertical and horizontal side, top and bottom rails, we then router a v-groove in the door corresponding with the solid timber inlays to give the effect of a solid timber engineered door.

These doors are manufactured with concealed hardwood edge only.

*All bespoke manufactured doors and doorsets can be offered (if within fire certification regulations) with any real wood veneer of your choice, aperture, glazing, acoustic seals, prefinished etc, Just let us know your specification and we will do the rest!*

## Islay

The Islay range of doors can be manufactured in FD30 or FD60 format with flush Plywood, MDF or Chipboard face and overlaid with any real wood veneer of your choice, the Islay range is manufactured by firstly inlaying solid timber (as per veneer choice) into the door face, we then overlay with a vertical grain veneer lay-on, we then router a v-groove into the face of the door corresponding with the timber inlays to give the effect of a lined and braced solid timber engineered door.

These doors are manufactured with concealed hardwood edge only.

*All bespoke manufactured doors and doorsets can be offered (if within fire certification regulations) with any real wood veneer of your choice, aperture, glazing, acoustic seals, prefinished etc, Just let us know your specification and we will do the rest!*

## Auskerry

The Auskerry range of doors is the start of our standard exterior solid core doors and can be manufactured in FD30 or FD60 format with a stain grade flush Plywood face.

As with all of our doors, the Auskerry range can be supplied with many different glazed and beaded apertures completely finished to building standards.

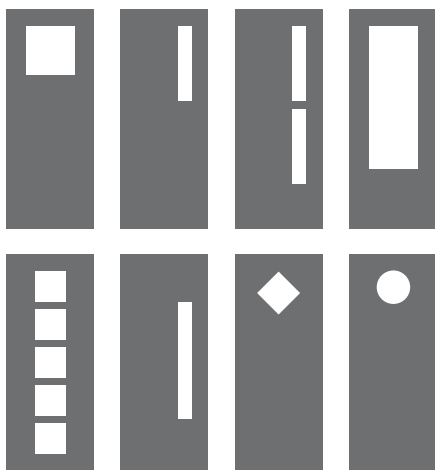

These doors are supplied with exposed hardwood lipped all round edges only.

Auskerry Stain Aperture

Auskerry Stain Plain

*All bespoke manufactured doors and doorsets can be offered (if within fire certification regulations) with any real wood veneer of your choice, aperture, glazing, acoustic seals, prefinished etc, Just let us know your specification and we will do the rest!*

## Nave

The Nave range of doors is a continuation of the standard range of exterior solid core doors but manufactured using a standard paint grade Plywood face, these can also be made in FD30 or FD60 format.

Once again these doors can be manufactured to building standards apertured, glazed and beaded.

These doors are supplied with exposed hardwood lipped all round edges only.

Nave Paint Aperture

Nave Paint Plain

*All bespoke manufactured doors and doorsets can be offered (if within fire certification regulations) with any real wood veneer of your choice, aperture, glazing, acoustic seals, prefinished etc, Just let us know your specification and we will do the rest!*

## Environmental Policy

As members of the UK Timber Trade Federation (TTF), Caledonian Plywood is committed to sourcing our plywood from well-managed, sustainable sources wherever possible. We were one of the first UK importers to sign up to the TTF's Responsible Purchasing Policy which documents and rates our suppliers according to their environmental record in the supply chain.

We comply with all current waste regulations and separate wood and paper for recycling purposes.

We are audited by SEPA (Scottish Environment Protection Agency) and are members of a packaging compliance scheme. We also believe in providing a safe, enjoyable working environment for our staff and are in full compliance with all relevant health & safety practices. Our commitment to meeting our environmental obligations includes a regular review of our policies in the matter. We do everything we can to ensure the products we supply and the service we provide are as environmentally friendly as possible.

*Caledonian Plywood are certified and accredited members of the following organisations:*
